

ZOID ADVANCED INTELLIGENCE MODE

v2.0 - Smart Martingale System

"Intelligence Before Execution"

REVOLUTIONARY SMART MARTINGALE

ZOID-AIM v2.0 represents the next evolution in intelligent martingale systems. Unlike traditional martingale EAs that blindly add positions, ZOID uses a sophisticated 4-layer entry intelligence system to ensure each trade is validated by multiple market conditions. The result? **402% profit in just 12 months** with controlled drawdown and adaptive risk management.

■ THE INTELLIGENCE ADVANTAGE

4-Layer Entry System	Every trade validated by Candle Close, MA Cross, SNR, and Market Structure
Adaptive Martingale	Smart position sizing with dynamic step multipliers
Structure-Aware Trading	Support/Resistance detection prevents bad entries
Capital Survival Protocol	Advanced trailing stop and breakeven protection
Performance Optimized	Reduced CPU usage with intelligent caching
Dual Entry Modes	Advanced filters or simple default mode

■ HOW THE INTELLIGENCE SYSTEM WORKS

LAYER 1: CANDLE CLOSE FILTER

Waits for candle completion before entry, preventing premature entries during price fluctuations.

LAYER 2: MA CROSS VALIDATION

Uses MA crossover detection to confirm trend direction before allowing entries.

LAYER 3: SNR (SUPPORT & RESISTANCE)

Automatically detects market structure levels. Only enters near support zones, avoids resistance.

LAYER 4: MARTINGALE FILTERS

Each averaging position validated against same filters, ensuring quality over quantity.
